About me

I am an undergraduate passionate about **Cyber Security, Computer Networking, and System Administration**, and I am excited to begin my professional journey in the tech industry. My dedication to understanding the complexities of securing digital landscapes and optimizing system performance, combined with a fresh view, makes me a motivated candidate ready to contribute and adapt to the ever-evolving world of IT.

Work Experience & Projects

Brute Force Detections using IBM QRadar SIEM
Infinite Learning Indonesia   September 2023

- Learning and installing IBM QRadar Web-based SIEM using virtual machines, detecting anomaly, creating custom rules that works as the detector for brute force attack on Linux operating system via virtual machine.
- Launching attack using Kali Linux to brute force through the victim's computer using virtual machines, detecting the threat and logs it using QRadar.
